

YUVRAJ SAXENA

B.Tech CSE (AI & ML) | Java DSA | Python | AI/ML | Backend Development
Lucknow, Uttar Pradesh, India • yuvrajsaxena17225@gmail.com • linkedin.com/in/yuvraj-saxena-966b3a365 •
github.com/YuvrajSaxena2512

PROFESSIONAL SUMMARY

B.Tech CSE (AI & ML) student with a 1st-year YGPA of 8.55 and a strong hands-on foundation in Java DSA, Advanced Python, OOP, JSON, File Handling, AI/ML and backend development. Comfortable learning and building through Vibe Coding, with practical experience using modern AI-assisted development workflows, APIs, databases and developer tools. Interested in software engineering, AI/ML, backend systems and building practical solutions.

EDUCATION

Galgotias College of Engineering & Technology — B.Tech CSE (AI & ML) | 2025–2029
Semester 1: 8.64 SGPA • Semester 2: 8.45 SGPA
1st Year YGPA: 8.55
ISC Class XII — 95% Overall | 97% PCM | 96% Java
ICSE Class X — 93%

TECHNICAL SKILLS

Programming & DSA: Java (DSA), Python, HTML, CSS
Python Development: Advanced Python, OOP, JSON, File Handling, Modular Applications
Data Science & AI/ML: NumPy, Pandas, Matplotlib, Jupyter Notebook, AI/ML Fundamentals
Backend & Databases: FastAPI, REST APIs, SQLite, SQLAlchemy
API & Developer Tools: Postman, Thunder Client, Swagger UI
Vibe Coding & Automation: AI-assisted Development, Prompt Engineering, n8n, Make
Version Control: Git, GitHub

PROJECTS

VEDRAQ — Disaster Response Decision-Support Platform | SIH 2026 • Team Primus • Team Lead

- Decision-support platform for disaster management, focused on routing, resource allocation, zone prioritization and What-If simulations for emergency response.

LifeMap — AI Astro-Tech Assistant | AI-Assisted Web Application • Minor Project

- AI-assisted web application that generates personalized astro-tech outputs from user-provided birth details, built as part of the user's software project portfolio.

Student Management System | Advanced Python • OOP • JSON • File Handling

- Python application using object-oriented programming, JSON-based data persistence and file handling to manage structured student records and operations.

Bank Management System | Advanced Python • OOP • JSON • File Handling

- Python banking application combining OOP, JSON and file handling to implement account management and transaction-oriented workflows.

Vahangrid TransitFlow — Transit / Mobility Platform | Software Project

- Transit-focused platform designed around route planning and mobility workflows.

Deal-Dost.AI — AI Legal-Tech SaaS | VibeCon Hackathon 2026 • Top 50 Finalist

- AI-powered Legal-Tech concept converting Hinglish/plain-language requirements into structured legal documents and contracts.

Trimux — AI Background Remover SaaS | Minor Project

- AI-powered workflow for automated image background removal and simplified visual editing.

LEADERSHIP & TECHNICAL EXPERIENCE

- Team Lead — Team Primus | SIH 2026: Leading the team developing VEDRAQ and coordinating project direction, development and execution.
- Robotics Member — Team Enthiran: Contributing to robotics-focused technical activities, teamwork and hands-on engineering.
- Contributor — GSSOC 2026: Participating in open-source development and collaborative software work.
- Technical Team Member — GFG Student Club: Engaged in technical learning, development activities and peer collaboration.
- Cloud & AI/IT Member — AWS Student Club: Participating in cloud, AI and technology-focused activities.

ACHIEVEMENTS & CERTIFICATIONS

- Top 50 Finalist — VibeCon Hackathon 2026
- Selected Contributor — GSSOC 2026
- 3★ Java & 3★ Python — HackerRank
- Generative AI For All — Infosys Springboard
- AI Tools Workshop — Be10X
- VibeCon Participation Certificate • Circuits to Code IoT Session
